

New Product Range for Nittoseiko Analytech

Combustion tubes and kits for NSX-2100V and AQF-2100H

Elemental Microanalysis is introducing its first range of products for two of Nittoseiko Analytech's* instruments: the combustion furnace AQF-2100H, for combustion ion chromatography, and the NSX-2100V trace nitrogen, sulfur and halogen analyser.

The new products on offer from Elemental are quartz outer and inner combustion tubes for each instrument, a mullite inner tube for the AQF-2100H, and the springs required for holding the tubes in position.

Elemental is also offering tube sets, giving customers even more value for money compared to OEM prices.

Part	Description	Compatibility	Nittoseiko Analytech part
C8200	Outer combustion tube, AQF-100F, NSX-2100V, AQF2100	NSX-2100V, AQF-2100H	FN2QPG
C8201	Combustion tube, inner, TS-100V, TCL-100	NSX-2100V	TS8QPN
C8202	Combustion tube, inner, for AQF-2100H	AQF-2100H	AQ3QPN
C8203	Spring for pyrolysis tube 4pcs/set	NSX-2100V, AQF-2100H	SX1QSP
C8204	Spring for pyrolysis tube 2pcs/set	NSX-2100V, AQF-2100H	8SX1QSPW
C8205	Mullite inner tube for AQF2100H, 1 pc	AQF-2100H	AQ3QMC
C8210	Combustion tube set for S/N/X and VF-210 (quartz) (1 each of C8200, C8201, C8203)	NSX-2100V	DT1VCL
C8211	AQF 2100H complete tube set (inner + outer in quartz) (1 each of C8200, C8202, C8204)	AQF-2100H	AQ3PS

*Nittoseiko Analytech was formerly known as Mitsubishi Chemical Analytech.

The use of Nittoseiko Analytech part numbers is intended for convenience only, and does not imply the products are of OEM origin. All Elemental Microanalysis products are guaranteed to be of high quality and are deemed to be suitable alternatives in the stated instruments. All Nittoseiko Analytech trademarks acknowledged.
