

Prepacked tubes and kits for EuroVector EA3100

Elemental Microanalysis is the approved manufacturer and supplier of EuroVector consumables, and is continuing to work with Leonardo Sisti, CEO of EuroVector S.R.L. to specify, manufacture and supply EuroVector consumables.

Elemental is pleased to introduce six new products for the EA3100 series of CHNSO elemental analysers: two prepacked reaction tubes, and four consumables kits – helping to save both time and money for customers.

The two new prepacked tubes we have added to the range are X1246V, for CHNS analysis of halogenated samples, and X1247V, for oxygen analysis.

The new start-up kits contain either X1246V or X1247V (as noted) plus the capsules as well as the reference materials appropriate to the type of analysis involved. Two further consumables kits provide the prepacked tubes and capsules for continuing each type of analysis. For further details of the contents of each kit, please click on the links below, or visit our website, elementalmicroanalysis.com

Part	Description	EuroVector part
X1246V	Prepacked reactor for CHNS for halogenated samples	C10-182
X1247V	Prepacked oxygen pyrolysis tube	C10-202
X3272	Start-up kit for 1000 analyses (CHNS with heteroatoms)	C11-074
X3273	Start-up kit for 1000 oxygen analyses	C11-075
X3274	Consumable kit for 1000 analyses (CHNS with heteroatoms)	C11-076
X3275	Consumable kit for 1000 oxygen analyses	C11-077

These products offer the same high quality and value for money that is typical of Elemental Microanalysis' entire product range. The complete range of EuroVector products for the [EA3100 series](#) can be found on our website.

EuroVector laboratory supplies are available to order from Elemental Microanalysis Ltd online, by email, telephone or fax. Elemental Microanalysis offers extensive knowledge of analysis, over 45 years of experience and a worldwide reputation for excellence.
